be higher after menopause. Talk with your doctor to see if you have a higher risk of weak bones or if you have any questions. This drug may affect fertility. Fertility problems may lead to not being able to get pregnant or father a child. If you plan to get pregnant or father a child, talk with your doctor before taking this drug. If you are 65 or older, use this drug with care. You could have more side effects. Tell your doctor if you are pregnant, plan on getting pregnant, or are breast-feeding. You will need to talk about the benefits and risks to you and the baby. Children: If giving this drug to your child and your child's weight changes, talk with the doctor. The dose of this drug may need to be changed. Do not give your child more of this drug than what the doctor told you to give. Giving more of this drug than you are told may raise the chance of severe side effects. This drug may affect growth in children and teens in some cases. They
